

HYDROLOG AFFORDABLE PURE WATER SOLUTIONS LLP

REVERSE OSMOSIS SYSTEMS

IRO Series of Reverse Osmosis Systems are capable of treating Brackish water with TDS upto 8000 ppm. This water can be further utilized in a variety of applications.

FEATURES

1. Modular Construction – Good for future expansion
2. Class 1 Motor Available in HPP
(Optional)- Highly Efficient
3. Powder Coated Skid / SS Skid
4. Control Panel with High Pressure , Low Pressure Protection. Alarm Provision optional.
5. High Quality Fabrication.
6. Can take high TDS input levels
7. High Recovery upto 75 %
8. Various arrays depending upon space availability
9. Options Available in Automation Instrumentation
10. IRO-OR Series available with ORP Meter and Dump Valve

SPECIFICATIONS

MEMBRANE DIA	8 " / 4"
FLOW RATE	400 LPH - 40000 LPH IN SINGLE SKID
RECOVERY	30 % TO 75 %

APPLICATIONS

1. Potable Water
2. Drinking Water
3. Process Water
4. Demineralized Water
5. Waster Water Recycling
6. Boiler Feed Water
7. Industrial Applications, Commercial Applications , Domestic Applications
